AT WORST STAGE, SAY FUEL CHIEFS

Suffering Must Increase Here Unless Warmer Weather Brings Relief.

The combination of savage elements -heavy snow and bitter cold-which the local Fuel Administration has feared all winter and which is now gripping the whole Eastern half of the country, has brought about, in their estimation, the climax of the coal famine. Here is the way three of the men presiding over New York's coal destinles viewed the situation to-day:

Harry T. Peters, Chairman of the Coal Conservation Committee: "We are facing the most serious and critical coal shortage of the entire winter. 1 say this after careful examination of conditions at mines and after complete reports from experts. I think we can pull out of this tight situation if the weather will only moderate and more snow does not

Joseph A. Hall, Deputy State Fuel Administrator: "Conditions, que t the heavy snows all along the line from the mines to tidewater, are a bad as they possibly could be. At the mines the severe cold has frozen pumps, clogged switches and almost brought traffic to a standstill. Up State electric light companies and other public utilities companies are shutting down for lack of fuel. We are taking care of all of New York City's public institutions at present

W. B. Pollock, Marine Superintendent: "If this zero weather continues! for the next forty-eight hours we will be in a very desperate situation. Ic

harbors, according to W. H. Pellock, of their home town. of Eastern Railroads A. H. Smith.

creased scarcity of coal in tenements the heast of the 205th that they were and stores in the poorer sections of the first regiment fully equipped and the city, the wholesale coar dealers trained. Other regiments and ordealers who obtain their coal direct to the cellar dealers. These latter small dealers are dependent upon the wagon dealers exclusively because of their lack of hauling equipment.

The wholesaiers have discovered that many consignments of coal sold by them to the middlemen who suploads to the highest bodder at rates

wagon dealers were receiving more ference in the world in the men of the coal from the wholesafers that they did last year. For example, from one yard 1,052 tons were sold to wagon dealers on Jan. 29 as against 952 on the soldier, the soldier, their weapons until they are more fully supplied.

The rank and nic of the sold is essentially a New York built shy of material, has cannon enough through the camp streets with the use of their weapons until they are more fully supplied.

The rank and nic of the sold is strength on the product of the action and the division as well as the cannonment and everything in it and they can be put thirty-six years in the Regular Army in all parts of the

Even the gunman has learned hat a bunch of fives wrapped up in a s better than sand wrapped in a or five bullets in a gun, when haven't got your gun. The life of WASHINGTON, Feb. 5. - Tes soldier is a great leveller. Here is what Gen. Evan M. John-on, in command of the 77th Division, ays of his command: Referring to the condition of early \$24,000,000 a day.

Referring to the condition of this command generally, it may be stated that from a sanitary point of view, I consider it remarkably, almost phenomenally good. Out of 45,000 men who have passed through the division in the last five months, only about thirty men have died from all sease. The present rate of ineffectives in the division from all bources per 1,000 is twenty. It will thus be seen that from a health point of view the division stands far above the normal.

In point of clothing, it may be stated briefly that we need nothing. The infantry is practically equipped for the field. There are some shortages, but these are of such a nature that it would not prevent effective field work, the infantry of the division had target practice, although owing to inclement weather this has not been faished. In the artillery there is a shortage of material. all artiflery organizations with

We have a sufficient quantity of machine guns on hand to ther-oughly train the fourteen machine The morale of the men is excel-

been so exemplary that it has not been accessary to have guards in any of the outlying towns, which any of the oddising towns, when in itself is amusual and unique. As to health, morality, training and discipline, the conditions are far better than I would have beiteved possible in the time during which this division has been or-
